

Swap
pressure
ranges in
seconds

Wide range of
plug and play
external remote
pressure sensors

DPI 705E

- **Cover a wide range of pressure ranges:** From 25 mbar to 1400 bar in Absolute, Gauge and Differential configurations
- **Plug and Play sensors:** Each pressure sensor holds its own calibration data (including date of calibration). With a single DPI 705E you can fit any of the remote sensors to swap pressure ranges in seconds
- **Temperature capability:** Optional remote plug and play Resistance Temperature Detector (RTD) sensors
- **Enhanced accuracy:** Total 1 year uncertainty up to 0.05% full scale (FS) over a temperature range of -10°C to +50°C
- **Enhanced leak timer:** Leak test mode rapidly configurable between 1, 3 or 5 minutes
- **Enhanced battery life:** Power efficient design, can be used for 8 hours per day, 6 days per week for 1 year using a single set of batteries.
